DETAILED ACTION

Examiner's Comment

1. In order to avoid abandonment, the corrected drawing sheets filed on April 1, 2002 and January 12, 2006 are acceptable, however, Replacement Sheets are required. The amended replacement drawing sheets should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d).

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

3. Authorization for this examiner's amendment was given in a telephone interview with Samuel Borodach (Registration No. 38,388) on September 28, 2006.

The application has been amended as follows:

(A) In the **claims**:

a) **Cancel** non-elected claims 10, 13 – 22 and 24 – 27.

REASONS FOR ALLOWANCE

4. Claims 4, 23 and 28 are allowed.

5. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or suggest, either singularly or in combination, at least a plurality of recesses in a rear surface of an insulating resin, the rear surface of first and second die pads and external connecting electrodes being exposed within the recesses, wherein at least one bridge is exposed within at least one of the recesses; wherein a rear surface of the at least one bridge is recessed relative to the rear surface of the insulating resin; wherein the rear surface of the at least one bridge is covered by an insulating film; and wherein an entire rear surface of the semiconductor device is covered by an insulating film except for a part of the rear surface that is an external connecting electrode as set forth in claim 4. Lin et al. (U. S. Pat. No. 5,273,938) teaches at least a plurality of recesses in a rear surface of an insulating resin, the rear surface of first and second die pads and external connecting electrodes being exposed within the recesses, wherein at least one bridge is exposed within at least one of the recesses; wherein the rear surface of the at least one bridge is covered by an insulating film; and wherein an entire rear surface of the semiconductor device is covered by an insulating film. Fjelstad (U. S. Pat. No. 6,001,671) teaches an entire rear surface of the semiconductor device is covered by an insulating film except for a part of the rear surface that is an external connecting electrode. However, Lin et al. and Fjelstad do not disclose wherein a rear surface of the at least one bridge is recessed relative to the rear surface of the insulating resin as set forth in claim 4.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
